SUMMARY

Certified Software Engineer with 3
years of experience in developing features for Android, iOS and Web applications for educational platforms. Helped ABC company expand its business operations to 6 new countries by developing over 35 features for its language-learning application, using Java, Kotlin, Android and iOS SDK, Swift and JavaScript. This attracted more than 1.7 million new customers to its platforms and earned $34 million in yearly revenue. Skilled in testing, troubleshooting, debugging, and working cross-functionally. Currently undergoing training for CIW Web Development Professional certification.

EXPERIENCE

Software Engineer

BeConnected

📅 07/2020 - 01/2023   📍 Wichita, KS

A Kansas-based provider of software development and technical support services to companies in the travel and lodging industry.

- Increased the NPS score of our signature product to 8.9 by expanding the customer analytics and reporting functions of the platform.
- Reduced CFR to 2.8% by updating current technical documentation and organizing a series of educational sessions among team members.
- Boosted the traffic of 10+ traveling websites by 300% by developing search and filtering endpoints, handling information from 7 airlines and lodging websites.
- Onboarded 5 new clients after presenting a streamlined way of handling payment endpoint errors at DevTernity 2022.

Software Engineer Intern

Renaud

📅 05/2018 - 06/2019   📍 Cleveland, OH

Renaud is an information technology company which develops and provides E-Commerce Solutions

- Employed Python and Django to contribute to 2 of the company's currently active projects.
- Debugged a long pending Auto-login issue in GUI for regression platform on day 1.
